July 20, 2009**

On July 20, 1969, Apollo 11 landed on the moon and U.S. astronaut Neil Armstrong, the first person to set foot on the moon said, "That's one small step for man, one giant leap for mankind." This weblibliography provides a list of U.S. electronic resources highlighting that historic event and the 50th anniversary of the National Aeronautics and Space Administration (NASA) as the U.S. continues to cooperate with other nations to explore and understand the worlds beyond mother earth. Resources produced by NASA listed in this weblibliography may be freely reproduced and distributed.
